PROFILE

Experienced **project and process manager** with 5+ years of professional experience in analysing and optimising business processes and in steering projects from planning to delivery. Works with business units to design efficient processes, brings tools and automation into workflows where they add value, and guides teams through change. Solid hands-on practice in process documentation and analysis, risk management, project coordination, stakeholder management, process KPIs (target-vs-actual comparisons) and **KPI reporting with Power BI**. Technical background as a mechanical engineer (B.Sc.) with experience in industrial and IT projects for **Volkswagen, Porsche, Audi and ZF**; **Six Sigma Green Belt**, Google Project Management Diploma. Analytical, conceptual, structured, self-directed and a strong communicator.

KEY STRENGTHS

Process excellence
Process analysis, optimisation and modelling (Visio, draw.io, Jira)

Project management
Planning to delivery, schedules, resources, budget, feasibility

Digitalisation & automation
Polarion-to-Jira automation, tool optimisation, AI, KPIs

Business analysis
Budget planning, cost control, target-vs-actual, KPIs, Power BI dashboards

Stakeholder & risk management
Business units, IT management, risk workshops, risk analysis

Change & training
Change management, training and onboarding of colleagues

CAREER TIMELINE

PROFESSIONAL EXPERIENCE

Project Manager / Process Manager

01/2025 – 08/2026

e.Solutions / Alten Consulting, Nuremberg

- Planned, coordinated and tracked 15+ IT and software development projects for the HMI software product of Audi, Porsche and Volkswagen with 25+ stakeholders, against quality, schedule and project goals
- Analysed, developed and optimised development and project processes and their supporting tools (Jira, Confluence, Polarion, SonarQube, Power BI, Bitbucket)
- Designed, digitised and modelled 10+ strategic processes and workflows in Jira/Confluence using DMAIC and PDCA, and standardised and visualised them in Visio and draw.io, cutting delivery time by 20%
- Ran 6 risk management processes including risk register analysis, risk workshops and the risk management plan, and advised Product Owners on process improvements, lowering product costs by 10%
- Automated the transfer of user stories from Polarion to Jira and automated further business processes
- Onboarded and trained new colleagues on existing processes and tools
- Carried out 10 change and problem management activities and coordinated lasting improvements, automation and standardisation, speeding up the release management process by 30%
- Built and maintained schedules, project plans, status overviews, KPIs and management reports/dashboards in Jira and Power BI
- Digitised, structured and tracked requirements, work packages, dependencies, changes and project activities with DevOps and Product Owners for 25+ teams
- Coordinated and aligned tasks across 25+ interdisciplinary development, test, quality and other project teams
- Communicated process status, project coordination, progress, risks, changes, open points and pending decisions clearly to 30+ stakeholders
- Owned requirements management, configuration management (SUP.8) including baselines and configuration audits, and change management, ensuring traceability, consistency and quality of development artefacts
- Quality assurance by designing and tuning quality gates and quality profiles in SonarQube, and documenting the processes
- Supported and facilitated Scrum events; applied agile methods including Scrum, Kanban and SAFe

PROFESSIONAL EXPERIENCE (CONTINUED)

Process Manager / Project Manager

11/2022 – 12/2024

4ACES-Tech GmbH, Wolfsburg

- Project lead and coordinator for 10+ international software and automotive customer projects for Volkswagen, Porsche and Audi, optimising 25+ processes
- Ran project planning and control for 10+ projects, including detailed level 4/5 schedules in MS Project and resource, budget and task planning
- Structured and tracked project activities, work packages, concepts and models, improving 25+ processes in operation
- Analysed requirements, risks and dependencies and derived suitable measures
- Wrote and maintained strategy, process and project documentation for 30+ teams across 10+ projects
- Coordinated collaboration between business units, project management and engineering teams
- Ran quality management and process improvement activities; prepared and supported gap analyses and mock assessments (audit preparation)
- Applied agile methods and PM tools such as Jira, Codebeamer, MS Project, SharePoint and Cplace
- Resource planning, risk analysis, feasibility analysis and budget and schedule management for 10+ international projects, cutting delivery time by 18%
- Ran and improved budget planning, cost control and target-vs-actual comparisons in project control, reducing product costs by 13%

Working Student, Project Validation Management

03/2022 – 10/2022

ZF Friedrichshafen AG, Koblenz

- Validated test activities as part of verification and validation, implementing the required steps according to ASPICE and the V-model
- Monitored and reported maturity across all systems with IBM DOORS, PTC Windchill and Power BI
- Evaluated processes and proposed improvements; developed and consolidated KPIs, PM processes and project reviews

Mechanical Engineer / PLC Programmer

10/2017 – 10/2021

AICT, Alexandria (Egypt)

- Planned preventive maintenance of ship-to-shore (STS) cranes in the port; owned PLC software and hardware (control technology) and programmed machines and PLCs (CoDeSys, Siemens Step 7 / TIA Portal, FUJI, GE)
- Maintained the elevators integrated into the cranes (OTIS, KONE) and analysed and fixed their faults and alarms
- Troubleshot, root-caused and fixed major electrical faults (bus systems, I/O modules, high-voltage drives)
- Documented alarms and automated maintenance systems, including solution documentation

Bachelor of Mechanical Engineering — 2016
Arab Academy for Science and Technology

Six Sigma Green Belt ↗ — 2024

Google Professional Project Management Diploma ↗ — 2022

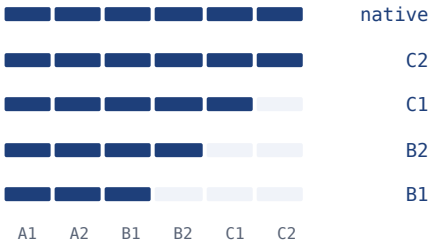

Google Agile Project Management Professional Certificate ↗ — 2026

IBM Information Technology (IT) Fundamentals for Everyone ↗ — 2026
Course within the IBM IT Scrum Master program

Microsoft Power BI Business Analyst ↗ — in progress · 2026

IBM IT Scrum Master — in progress · 2026

LANGUAGES

Driving licence, class B

CORE SKILLS & TOOLS

Process excellence	Process analysis, optimisation and modelling, workflow design, process documentation, process KPIs, quality management and quality assurance, audits, Lean, Six Sigma (DMAIC, PDCA), ASPICE, change management
Project management	Project leadership, project planning and control, customer projects, schedule and resource planning (level 4/5, MS Project), risk and change management, stakeholder management, reporting; V-model, Scrum, Kanban, SAFe
Business analysis	KPI management, Power BI reporting, risk analysis, feasibility analysis, budget planning, cost control, target-vs-actual analysis
Technical	PLC control technology (Siemens TIA Portal, Step 7, CoDeSys); requirements management tools (Polarion, IBM DOORS, PTC Windchill, Codebeamer); verification and validation
Commercial	Basic understanding of accounting
Tools	Jira · Confluence · MS Project · Power BI · Visio · draw.io · Polarion · SharePoint · Codebeamer · Cplace · Bitbucket · SonarQube · Jenkins · SQL
