5 languages, German at C2 level

PROFILE

Experienced **project and process manager** with 5+ years of professional experience in analysing and optimising business processes and in steering projects from planning to delivery. Works with business units to design efficient processes, brings tools and automation into workflows where they add value, and guides teams through change. Solid hands-on practice in process documentation and analysis, risk management, project coordination, stakeholder management, process KPIs (target-vs-actual comparisons) and **KPI reporting with Power BI**. Technical background as a mechanical engineer (B.Sc.) with experience in industrial and IT projects; **Six Sigma Green Belt**, Google Project Management Diploma. Analytical, structured, self-directed and a strong communicator.

KEY STRENGTHS

Process excellence
Process analysis, optimisation and modelling (Visio, draw.io, Jira)

Project management
Planning to delivery, schedules, resources, budget, feasibility

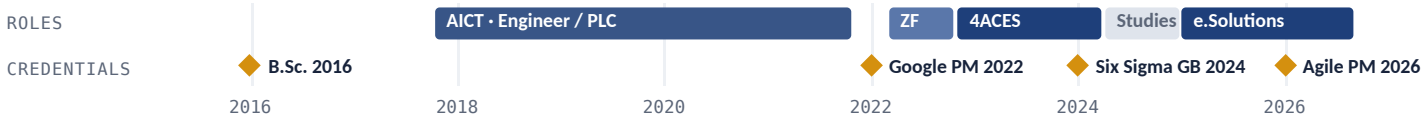

Digitalisation & automation
Polarion-to-Jira automation, tool optimisation, AI, KPIs

Business analysis
Budget planning, cost control, target-vs-actual, KPIs, Power BI dashboards

Stakeholder & risk management
Business units, IT management, risk workshops, risk analysis

Change & training
Change management, training and onboarding of colleagues

CAREER TIMELINE

PROFESSIONAL EXPERIENCE

Project Manager / Process Manager

01/2025 – 08/2026

e.Solutions / Alten Consulting, Nuremberg

- Planned, coordinated and tracked **15+ IT and software development projects** for the HMI software product with **25+ stakeholders**, balancing quality, schedules and project goals
- Analysed and optimised development and project processes and their tools (Jira, Confluence, Polarion, SonarQube, Power BI, Bitbucket)
- Designed, digitalised and modelled **10+ strategic processes** and workflows in Jira/Confluence; standardised and visualised them in Visio and draw.io, **cutting delivery time by 20%**
- Ran **6 risk management processes**, including risk register analysis, risk workshops and the risk management plan; advised Product Owners on process improvement, **reducing product costs by 10%**
- Automated the transfer of user stories from Polarion to Jira and automated further business processes
- Onboarded and trained new colleagues on existing processes and tools
- Carried out **10 change and problem management activities** and coordinated lasting improvements, automation and standardisation, making the **release management process 30% faster**
- Built and maintained schedules, project plans, status overviews, KPIs and management reports/dashboards in Jira and Power BI
- Digitised, structured and tracked requirements, work packages, dependencies, changes and project activities with DevOps and Product Owners for **25+ teams**
- Coordinated and aligned tasks across **25+ development, test, quality and other project teams**
- Communicated progress, risks, changes, open points and pending decisions transparently to **30+ stakeholders**
- Owned requirements management, configuration management (SUP.8) and change management, ensuring traceability, consistency and quality of development artefacts
- Designed and tuned quality gates and quality profiles in SonarQube and documented the processes
- Supported and facilitated Scrum events; applied agile methods including Scrum, Kanban and SAFe

PROFESSIONAL EXPERIENCE (CONTINUED)

Career break & professional development
04/2024 – 12/2024

Munich · Egypt / Germany

- Online courses in project and process management
- Prepared for and earned the Lean Six Sigma Green Belt
- Time with my new family

Technology Consultant / Project Manager
11/2022 – 03/2024

4ACES-Tech GmbH, Wolfsburg

- Led and coordinated **10+ international software and automotive projects** for Volkswagen, optimising **25+ processes**
- Planned and steered projects, including schedule, resource, budget and task planning for **10+ projects**
- Structured and tracked project activities, work packages, concepts and models, improving **25+ processes** in daily operations
- Analysed requirements, risks and dependencies and derived suitable measures
- Created and maintained strategy, process and project documentation for **30+ teams** across 10+ projects
- Coordinated collaboration between business units, project management and technical development teams
- Ran quality management and process improvement activities; prepared and supported gap analyses and mock assessments
- Applied agile methods and PM tools such as Jira, Codebeamer, MS Project, SharePoint and Cplace
- Led 10+ international projects in resource planning, risk analysis, feasibility analysis and budget and schedule management, **cutting delivery time by 18%**
- Led and optimised budget planning, cost control and target-vs-actual comparisons in project control, **reducing product costs by 13%**

Working Student, Project Validation Management
03/2022 – 10/2022

ZF Friedrichshafen AG, Koblenz

- Validated test activities and implemented the required steps according to ASPICE and the V-model
- Monitored and reported maturity across all systems with IBM DOORS, PTC Windchill and Power BI
- Evaluated processes and proposed improvements; developed and consolidated KPIs, PM processes and project reviews

Mechanical Engineer / PLC Programmer
10/2017 – 10/2021

AICT, Alexandria (Egypt)

- Planned preventive maintenance of ship-to-shore (STS) cranes in the port; owned PLC software and hardware and programmed machines and PLCs (CoDeSys, Siemens Step 7 / TIA Portal, FUJI, GE)
- Troubleshot, root-caused and fixed major electrical faults (bus systems, I/O modules, high-voltage drives)
- Documented alarms and automated maintenance systems, including solution documentation

EDUCATION & CERTIFICATES

Bachelor of Mechanical Engineering — 2016
Arab Academy for Science and Technology

Six Sigma Green Belt — 2024

Google Professional Project Management Diploma — 2022

Google Agile Project Management Professional Certificate — 2026

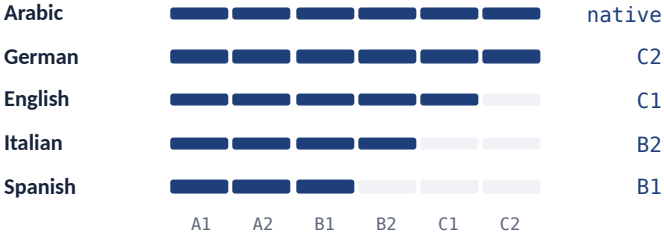

Microsoft Power BI Business Analyst — in progress · 2026

IBM IT Scrum Master — in progress · 2026

IBM Information Technology Professional Certificate — in progress · 2026

Driving licence, class B
